IMMUNE : BURNING, DAZED

The shimmering mag halo strapped on its back gives The August a nearly angelic appearance. Nero personally designed this custom, down to the details of its massive blade.

Its red frame is gilded with gold trims, truly a chariot fit for king. A chariot ready to deliver peace. By any means necessary.

## THE PACIFIST WAR PRINCE

The Princely CEO of the Midas Foundation is an enigmatic character to say the least. He always carries a sketchbook, constantly drafting new MEC designs. Not MECs for war or "defense," but for agriculture and construction. A simple fantasy, with no real market in an age dominated by violence.

Nero's goal is simple, though he only tells his trusted few about it: Total global disarmament. Namely the removal of all MECs from the face of planet Earth. A bold plan from a prince who grew up on a fortune of war profiteering. All for the end goal of pacifism.

To this end he's been collecting information on how one might "silence" all Betyl, and he thinks the answers may lie in an artifact he recently acquired: The Clear Betyl Grimmoire.

Needless to say he won't give it up easily.
